

CallegraFAX™

Integrated Faxing

Callegra .NET™

- CallegraVOICE™
- CallegraFAX™
- CallegraNBOX™
- CallegraWEB™
- CallegraTTS™
- Callegra .NET SRM™

CallegraFAX expands the functionality of the Callegra mailbox by providing users with an accessible and flexible fax interface. Users can manage incoming faxes from any telephone or view them as attachments in their email inbox. Callegra client users (including CallegraWEB and CallegraNBOX) gain additional productivity with on-screen viewing, OCR and electronic archiving. Callegra client users can also fax documents directly from Microsoft™ Windows based applications to fax machines, email addresses, or other Callegra mailboxes.

Key Benefits:

- Improved Productivity & Personalization
- Intuitive Print to Fax
- Remote Access and Control
- Confidentiality
- Callegra Client Integration

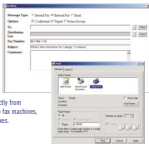

Improved Productivity & Personalization

Integrating fax capabilities into the network turns cumbersome manual fax activities into powerful, efficient communications for every user. Traditionally, documents had to be individually printed then transmitted by a fax machine—an expensive process in terms of time and human resources. Dramatically improving the productivity and transmitted document quality of today's fax sender, CallegraFAX provides an easy-to-use fax coversheet and a sent faxes log that not only verifies fax transmission status, but also allows for resending.

Inbound faxes are received directly into Callegra mailboxes allowing either client or telephone access. If a printed copy is needed, telephone users can send the fax to their primary fax machine, or enter the fax number of their current location. CallegraFAX generates and stores fax documents as digital (.tif) files to ensure and preserve the quality and legibility of faxed documents—especially when resending or forwarding to other people. Client users can view and print directly from their computers.

Intuitive "Print to Fax"

Sending a document to a fax machine or a Callegra mailbox is as easy as selecting "CallegraFAX" as the printer from any application running on Microsoft Windows. The integrated Microsoft Outlook Contacts Address Book makes organizing and inserting fax numbers or email addresses quick and easy.

Selecting the CallegraFAX Printer opens the Send Fax Address Dialing Box

CallegraFAX™

Integrated Faxing

Remote Access and Control

CallegraFAX ensures that incoming faxes are always as close as a telephone or PC, eliminating the need for someone back at the office to get involved—saving time and making everyone more productive. Callegra users on CallegraFAX enabled systems can forward faxes from their mailbox to any fax machine or to another user simply by using the telephone. Additionally, users can elect to receive incoming faxes as (.tif) files directly into their email inbox or use a Callegra client to view, download, archive, route, or print faxes as needed from their PC or Internet browser—especially when away from the office.

Confidentiality

Faxes containing sensitive information that arrive at a department's fax machine have no way of being distinguished from normal business communications. CallegraFAX routes incoming faxes directly into personal mailboxes, eliminating the need for manual screening and distribution. Confidential information remains confidential, enabling customers and employees to feel more secure about exchanging information.

Callegra Client Integration

Callegra .JIC can forward digital copies of incoming faxes to any email inbox through the use of Callegra's email notification feature. For advanced client integration, CallegraFAX leverages the visual strength of CallegraINBOX for Microsoft Outlook and CallegraWEB for Internet Explorer to make quick viewing and outbound faxing possible. (See the CallegraDESK for Microsoft Outlook or CallegraWEB for Internet Explorer brochures for more details.)

Received faxes are viewed using .JIF viewers supplied with all Microsoft Windows systems.

Callware solutions are distributed through a worldwide network of trained solution providers that provide local expertise for small to enterprise class businesses. Since its inception in 1994, Callware has received numerous awards for its leadership in serving customers both domestically and abroad.
