

**CyTrack® launches with LG-Nortel UK  
with  
Capstan Communications**

*Gordon Smythe, MD of Capstan, states that the introduction of CyTrack as a strategic partner affords LG-Nortel Resellers greater competitive advantage when selling against the likes of Avaya's IP Office*

**SYDNEY — May 30th , 2007** — Today Capstan Communications UK, recently appointed as CyTrack Technologies exclusive UK Distributor, congratulates CyTrack on winning the coveted Consensus Software Award 2007 with their Business Communications suite of software.

Building on huge success in Australia, Capstan and CyTrack are now ready to show UK Resellers what a truly advanced Contact Centre and CTI product should and can do. Gordon Smythe, MD of Capstan, states that the introduction of CyTrack as a strategic partner affords LG-Nortel Resellers greater competitive advantage when selling against the likes of Avaya's IP Office. Smythe continued by explaining that CyTrack is especially suited to the LG-Nortel Range due to its ability to integrate with proprietary technologies such as the LG-Nortel Voicemail boards and MSN messenger – something that other CTI solutions would find it difficult to achieve.

The entire range of CyTrack Business Communication Software will be available from Capstan from the 1st June this year, with a number of national events being planned.

**About CyTrack**

The Telephone is still one of our most used business tools and yet is vastly under utilised and under exploited given the technologies available today in Computer Telephony Integration (CTI) Call Centre Applications and the Internet.

The CyTrack Suite of Business Communications Products are an enabling modular suite designed to deliver the business benefits and functionalities that Computers, Telephones and the Internet can provide.

Founded in 1995, CyTrack® is a 100% Australian owned company with over 12 years experience specialising in development and distribution of CTI Telephony & Call Centre Business Communications Software.
